Objectives

Objectives:

We have decided to decompose the general objective into the following objectives.

RES-SIAS's main objective is to enhance the capacities of high education institutions (HEI) in Chile and Colombia to educate undergraduate and postgraduate students that support the development of modern, gender-inclusive, and decarbonized agricultural and livestock sectors. As a result of this objective, at least one undergraduate or graduate program in each Latin American university will be modified to include the topic of renewable energy in agriculture.

The modification of the program will consist of the inclusion of a new elective course or the inclusion of the subject in existing courses. In addition, the possibility of developing continuing education programs on the topic will be considered.

Objectives

Specific Objectives:

We have decided to decompose the general objective into the following objectives.

01

Identify competencies

Identify the competencies (*knowledge, skills and abilities*) professionals require to integrate innovative renewable energy technology in agricultural and livestock sectors.

02

Identify programs

Identify existing programs at the undergraduate or postgraduate level in the Latin American HEI in which integration of innovative renewable energy in agricultural and livestock sectors can be included.

03

Detect pathways

Detect existing pathways connecting training programs and career opportunities related to the integration of renewable energy systems in the agricultural and livestock sector.

04

Improve capabilities

Improve the capabilities of HEI in Chile and Colombia to develop relevant practical training related to renewable energy technology in the agricultural and livestock sectors.

Objectives

Specific Objectives:

We have decided to decompose the general objective into the following objectives.

05

Achieve communication

Achieve adequate communication of the project evolution and results in the participating countries and with relevant stakeholders.

06

Create Community

Create a community to exchange knowledge and experience in integrating innovative renewable energy systems in the agricultural and livestock sectors.

07

Identify Strategies

Identify strategies and methodologies to make the study programs related to renewable energy technology in agricultural and livestock sectors more gender inclusive.

08

Women Role

Study the role of women in the agricultural and livestock sectors and design empowerment and leadership programs for women in these sectors

Tabla

We have decided to decompose the general objective into the following objectives.

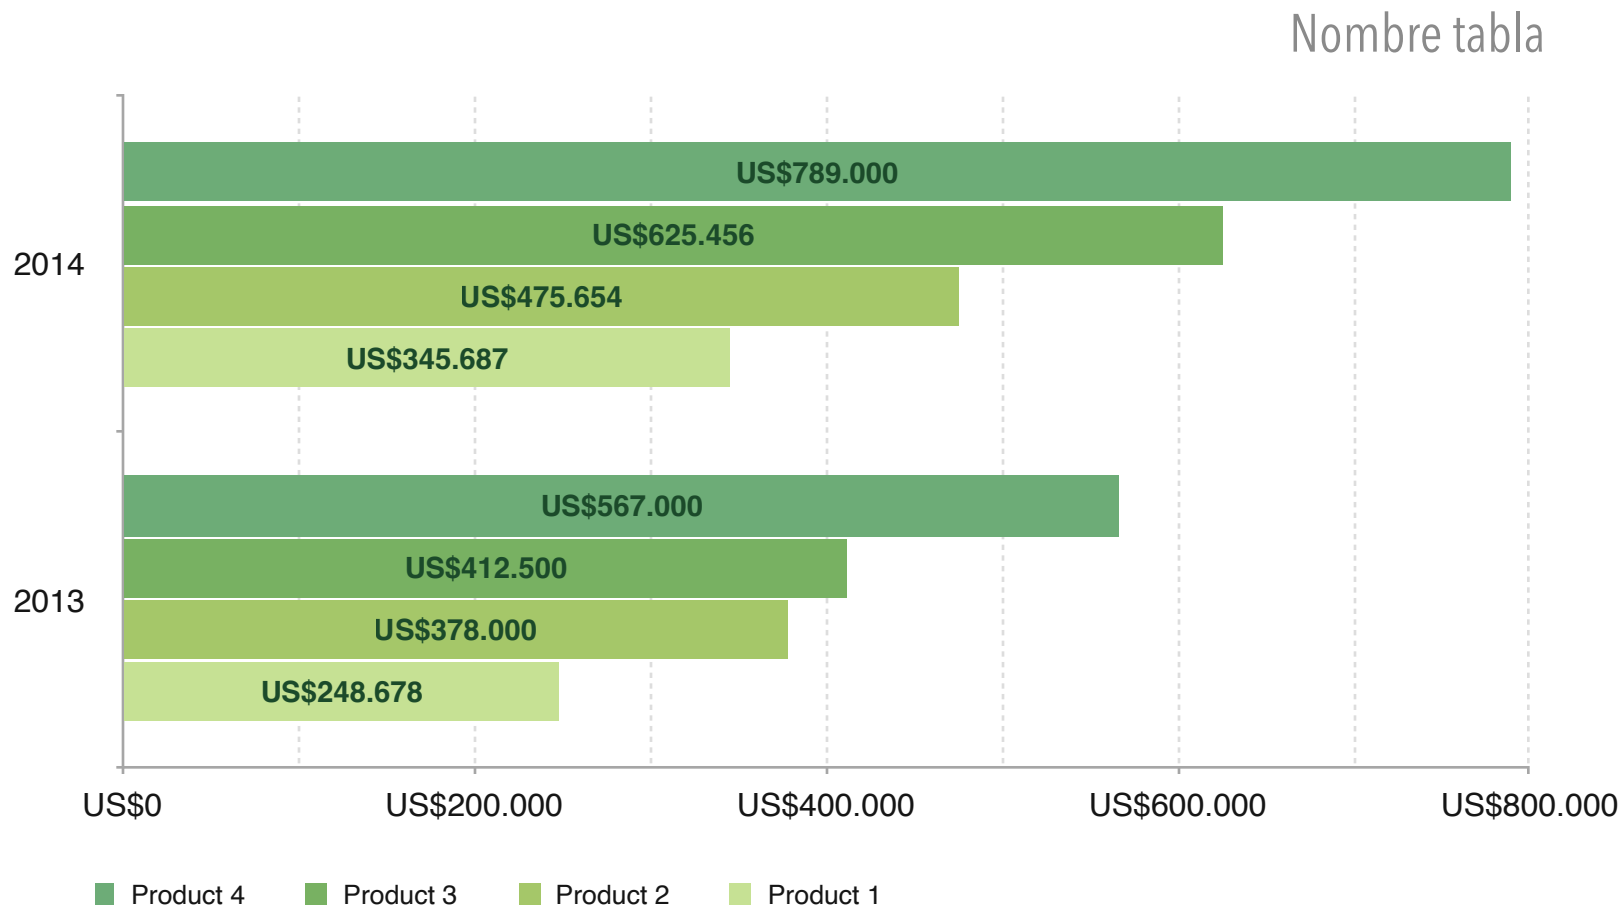

Risk N°	Description	Work Package N°	Proposed risk-mitigation measures
1	Mobility between countries may be limited	WP3, WP4, WP5 AND WP6	If travel constraints occur, this risk will be mitigated by training and remote meetings.
2	Low participation in workshops and seminars	WP3, WP4, WP5 AND WP6	Due to sanitary measure, the amount of people allowed to attend and event may be limited. The consortium will make most of the events hybrid, making it available online in real-time or recorded
